

FF 54Q16-N301 MIX

Forage Mixes & Blends

SEEDS & SCIENCE

Description

FF 54Q29-N301 is a premium forage mix designed for exceptional yield potential and forage quality. The alfalfa provides a reliable foundation with its superior nutritional value, disease resistance, and adaptability, while the timothy enhances the mix with added palatability, spring vigor, and forage quality. FF 54Q29 alfalfa stands out for its multi-race Aphanomyces resistance, allowing successful establishment and persistence in challenging environments. With a Fall Dormancy rating of 4, it performs well across various climates, ensuring steady growth throughout the season. Its robust disease and pest resistance package includes high resistance to Phytophthora Root Rot, Verticillium Wilt, Anthracnose, and Stem Nematode, as well as resistance to Pea Aphids, Spotted Alfalfa Aphids, and Fusarium Wilt. FF 54Q29-N301 delivers dependable performance and exceptional forage value for a wide range of livestock operations.

Contains:
60% 54Q16 Alfalfa
40% Richmond Timothy

Key Features

- FF 54Q16 alfalfa and grass blend
- High yield
- High forage quality, palatability and digestibility
- Excellent disease protection and winter hardiness
- Early-season growth

The Forage First® 5 Series by DLF features high-quality alfalfa varieties, continuing the legacy of previous seed suppliers. With proven genetics and exceptional yield, quality, and digestibility, it supports dairy and livestock production, backed by expert support and innovative research.

Components

60%

Alfalfa

40%

Timothy
