

# Quatro

## Sheeps Fescue

### SEEDS & SCIENCE

#### Description

Quatro Sheep Fescue is an extremely fine bladed bunchgrass that produces an exceptionally dense deep dark turf. It provides durable, attractive turf under a range of mowing heights, soil conditions and growing environments. Quatro establishes rapidly from seed, yet is one of the slowest growing grasses commercially available. Quatro exhibits drought and heat tolerance and will remain green under drought stress-induced dormancy. Quatro was bred specifically for improved shade tolerance, low mowing heights and reduced maintenance conditions. It is best adapted in northern regions of the temperate cool season zones where heat and humidity related diseases are minimal. It can be successfully utilized in full sun or shade, in parks, playgrounds, golf course tees, fairways and roughs. It is compatible in turfgrass mixtures containing Kentucky bluegrass, per. ryegrass, colonial bentgrass & other fine fescues.

#### Key Features

- Exceptionally dense, deep, dark turf
- Establishes rapidly from seed
- One of slowest growing commercially available grasses
- Exhibits drought and heat tolerance
- Bred for improved shade tolerance, low mowing heights, and reduced maintenance conditions
- Can be successfully utilized in full sun or shade

Alliance for Low Input Sustainable Turf® (A-LIST®), a non-profit that evaluates and promotes turfgrass varieties needing less water, pesticides, and fertilizers. Through rigorous testing, A-LIST® ensures our approved grasses excel in performance and sustainability.

## General Characteristics

|                                       |               |
|---------------------------------------|---------------|
| Establishment (Days)                  | 18-21         |
| First Mowing (Days)                   | 14-28         |
| Endophyte + (Yes, No)                 | No            |
| Germination (Days)                    | 7-14          |
| Mowing Frequency (Per Week)           | 1             |
| Nitrogen Requirement (Low, Med, High) | Low           |
| Segment                               | Turfgrass     |
| Species                               | Sheeps Fescue |
| Sci. Name                             | Festuca ovina |

## Seeding Information

|   |         |
|---|---------|
| Approx. Seeds/Lb.                             | 500000  |
| Approx. Seeds/Kg.                             | 1100000 |
| Seeding Rate - Alone/New (Kg./Hectare)        | 225-285 |
| Seeding Rate - Alone/New (Lbs./Acre)          | 200-250 |
| Seeding Rate - Overseed (Lbs./1000 sq. ft.)   | 2-4     |
| Seeding Rate - Interseed (Lbs./1000 sq. ft.)  | 2-4     |
| Seeding Rate - Interseed (Kg./100 sq. meters) | 1-2     |
| Seeding Rate - New (Kg./100 sq. meters)       | 2-3     |
| Seeding Rate - New (Lbs./1000 sq. ft.)        | 4-6     |
| Seeding Rate - Overseed (Kg./100 sq. meters)  | 1-2     |
